EXPERIENCE

Macias Gini & O'Connell LLP

Mar 2026 – Present

AI Intern

Bengaluru, India

- Developing an **Agentic Scheduler** leveraging the **DSPy framework** to automate complex workforce allocation by synthesizing employee availability, client requirements, and historical revenue data.
- Implementing **programmatic prompt optimization** via DSPy to enhance the reliability of LLM-driven decision-making, ensuring high-fidelity scheduling recommendations.
- Architecting a multi-source data integration layer to provide the agent with real-time access to company-wide human resource and financial metrics.

Delta Education

Feb 2025 – Present

Co-Founder

Bengaluru, India

- Engineered a scalable learning ecosystem** from the ground up supporting **4000+ users** and generating a revenue of **3.8L+** revenue within 3 months.
- Curated and deployed 10+ comprehensive test series** aturing integrated text and video solutions, specifically designed for high stake entrance exams (e.g. Scaler School Of Technology)
- Scaled admission readiness** by conducting mock interviews providing data driven career guidance resulting in a 48.9 percent student success rate for new age Indian colleges.

GoKapture Hub

Aug 2024 – Dec 2024

Backend Intern

Bengaluru, India

- Developed a central monitoring system using Prometheus, Loki and Grafana for effective server health monitoring and logging.
- Built a **secured login workflow** using NextJS and **MongoDB**, ensuring reliable user authentication and session management.
- Enhanced application by adding new features **optimizing** the existing functionalities to boost performance and user experience.

PROJECTS

Scalix

Tech: Go, Gin, Goroutines, Channels, In-memory storage, LRU eviction, TTL handling, Git, GitHub

- Engineered a **high-performance, scalable** key-value store system inspired by Redis, supporting efficient **GET, SET, and TTL-based** expiration operations with minimal latency.
- Designed and implemented a **multi-threaded** architecture with **in-memory data** persistence and custom eviction strategies (e.g., **LRU**), achieving up to **2000 RPS** under load.
- Integrated **horizontal scalability** and **fault tolerance** features, enabling distributed data across multiple nodes.

Petrol-Splitter

Tech: React Native, Express, Firebase, Rest APIs, Firestore (NoSQL).

- Architected a **Node.js backend** to handle concurrent expense logging and automated balance calculations for diverse user groups.
- Optimized user experience by incorporating **UPI payment integration**, allowing users to settle debts directly from the app interface.
- Designed a robust reporting module that generates detailed insights into fuel efficiency, maintenance trends, and individual spending habits.

EDUCATION

Scaler School Of Technology

July 2023 – July 2027

Undergraduate in Computer Science

Bengaluru, India

- GPA / CGPA / CGR: **8.90**

Birla Institute of Technology and Sciences

July 2023 – July 2027

B.Sc (Hons.) in Computer Science

Bengaluru, India

- CGPA: **8.99**

TECHNICAL SKILLS

Languages

Java, Python, Go, Javascript

Backend & Frameworks

NodeJs, Express, React, FastAPI, React Native, React

Databases

MySQL, SQL Server, MonogDB

Tools

Git, Github

VOLUNTEERING

Student Council, Scaler School Of Technology

Oct 2023 – Nov 2025

General Secretary

Bengaluru, India

- Organized and managed council meetings, maintaining detailed records and minutes.
- Facilitated effective communication between council members and the student body.
- Developed strong organizational and leadership skills through active involvement.
